Competition List by Career Cluster (2023-2024)

PLEASE read the instructions below before viewing the list that follows.

This is a list of contests available at the State Leadership & Skills Conference based on the Career Clusters. Contests that are specific to a program under that career cluster will be listed along with contests that are not program specific. It is still recommended that you review the contest descriptions and technical standards to ensure your student would be qualified to compete safely in that contest. This is due to some contests being open to anyone, but they may need a specific skill or equipment to perform at a level that gives them a competitive chance at the conference. There is the possibility of a contest not listed as still fitting for a student or program, but this should help guide new and seasoned teachers/advisors.

Contests that are specific for students qualifying under ADA are listed separately at the bottom and are open to any of those qualifying students regardless of their career cluster.

Due to many contests being open to any student, and/or team events allowing students from multiple clusters, you will see some listed under multiple, if not all career clusters. Please note that the competition listed as Career Pathways Showcase has a separate competition for each career cluster. You can read the technical standards for that breakdown. Contest levels (Middle School, High School, College) and Contest Limits are on the Contest List & Limits Form online.
